

HENRY OPEYEMI

Data Analyst/ML Engineer

✉ victorvict15@gmail.com 📞 +234 8101616290 📍 Agege, Lagos State 🌐 Opeyemi Henry 📅 27-08

PROFESSIONAL SUMMARY

Highly motivated Engineering undergraduate transitioning into data science and machine learning. Combines a strong analytical foundation with hands-on experience building end-to-end predictive models, data analysis pipelines, and interactive web deployments. Proven ability to collaborate effectively in team environments to solve data-driven problems and build user-facing AI solutions.

KEY SKILLS

- **Microsoft Excel:** Advanced Formulas (XLOOKUP, INDEX/MATCH), PivotTables, Power Query (M), Power Pivot, Data Modeling, VBA/Macros.
- **Power BI:** DAX (Data Analysis Expressions), Report & Dashboard Design, Data Connectivity, Gateway Management, Row-Level Security (RLS).
- **SQL:** Basic Querying (SELECT, FROM, WHERE), Joins (INNER, LEFT, RIGHT), Aggregations (GROUP BY, SUM, AVG), Data Filtering.
- **Statistics:** Descriptive Statistics, Hypothesis Testing, Probability, Trend Analysis.
- **Python:** Exploratory Data Analysis (EDA), Predictive Modeling, Feature Engineering, Scripting, Notebook Environments.
- **Machine Learning:** Classification (K-Nearest Neighbors), Clustering (K-Means), Model Training, Performance Evaluation.
- **Tools & Deployment:** Streamlit (Web Application Deployment), VS Code (Local Environment Configuration), Google Colab (Cloud Workflows).

EDUCATION

B.Eng. Computer Engineering Obafemi Awolowo University	2023 – 2028 Ile-Ife, Osun State
Senior Secondary School Certificate (SSCE) Supreme Education Foundation Schools	2022 Magodo, Lagos
Bsc. Computer Science University of the People	2025 USA

PROFESSIONAL EXPERIENCE

Machine Learning Engineering Trainee TechCrush	03/2026 – 06/2026 Remote
• Completed an intensive, 15-week accredited program covering foundational and advanced concepts in Artificial Intelligence and Machine Learning. • Collaborated within a development team to design, build, and deploy an end-to-end Credit Card Fraud Detection machine learning model. • Utilized Python and Google Colab to perform comprehensive data analysis, feature engineering, and model training. • Deployed the final predictive model as an interactive web application using Streamlit to ensure a user-friendly frontend interface. • Contributed actively to the technical documentation and final report writing, effectively communicating complex model performance metrics to project stakeholders.	

Data Analyst

Ecoservants

2025
Remote

- **Automated Reporting & Efficiency:** Developed and maintained automated performance dashboards in **Power BI**, reducing weekly manual reporting time by [X]% and providing leadership with real-time visibility into key operational metrics.
- **Data Integrity & Advanced Excel:** Leveraged **Advanced Excel (Power Query & Pivot Tables)** to clean and consolidate disparate datasets from multiple departments, improving data accuracy by [X]% and ensuring reliable reporting for sustainability initiatives.
- **Database Integration (SQL Growth):** Collaborated with the IT team to transition legacy spreadsheet data into a relational database; utilized **SQL** to perform basic queries and joins, streamlining the data retrieval process for monthly environmental impact assessments.
- **Insight Generation:** Analyzed historical service data to identify trends in resource allocation, leading to a [X]% optimization in service delivery routes and significant cost savings.

AI & Machine Learning Intern

Codveda

06/2026

- Participated in an AI and Machine Learning internship track focused on building foundational data science applications.
- Developed data analysis scripts using **Python** to perform exploratory data analysis and prep datasets for modeling.
- Implemented and experimented with classification and clustering algorithms, including **K-Nearest Neighbors (KNN)** and **K-Means**, within a **Google Colab** environment.
- Configured local development environments using **VS Code** to transition data workflows from cloud notebooks to local scripts.

PROJECTS

Data Integrity and Standardization initiative

2025

Tool: Microsoft Excel (Power Query, Advanced Formulas)

- **The Challenge:** Overhauled a disorganized database of [e.g., Client Records or Service Logs] at Ecoservants that contained duplicates, inconsistent formatting, and missing values.
- **The Action:** * Used **Power Query** to automate the transformation and cleaning process (removing duplicates, null values, and correcting data types).
- Applied **Advanced Formulas** (TRIM, CLEAN, VLOOKUP/XLOOKUP) to standardize naming conventions across 1,000+ rows of data.
- Implemented data validation rules to prevent future entry errors.
- **The Result:** Improved data accuracy by [X]% and reduced the time required for monthly reporting, as the data no longer required manual fixes before use.
